Introduction

This document contains the collected elements of the OSGeo identity and provides guidelines for their use. It is a toolkit designed to help us create more consistent visual communications pieces. The system is both unifying and flexible allowing enough diversity to meet the demands presented by different audiences and applications while maintaining a consistent visual character that is both distinct and concise.

An Identity is more than a logo, typeface or color. When used thoughtfully and consistently, our identity becomes the unified voice of our organization. With so many variables, this style guide should be used to ensure brand consistency for current and future use.

Read through the entire style guide to make sure you understand rules, guidelines and how everything works together before using these assets to create OSGeo-related promotions. These assets are only to be used for official OSGeo communications. Do not use them to promote private businesses or for individual purposes.

The new OSGeo identity contains various elements and colors to add different flavors to applications, thereby keeping the look fresh for years to come.

In order to maintain a strong and consistent brand identity, it is important to look past just a logo and a name. Who we are, what we believe in, and those we serve all play an integral role in creating a comprehensive understanding of the correct OSGeo identity.

This style guide should be used to ensure brand consistency for current and future use. We realize that our brand is complex and with so many variables it is up to us to communicate it effectively. It should be used consistently to foster brand awareness.

If you have any questions or problems as you use these assets, contact OSGeo Marketing Committee at marketing@osgeo.org.

Primary logo

The OSGeo primary logo is the most important element of the brand identity. It symbolizes our services, our products and our mission and must appear on all of our communications. The new visual treatment is designed to strengthen the identity and present a more focused positioning. The OSGeo logotype was carefully created using proportional spacial considerations. It is important to use the logo properly and consistently throughout the materials so that it stays memorable and recognizable within our community.

Never tamper with the elements of the logo or any of its elements. The Corporate Logo includes the tagline at all times. Do not remove the tagline. Do not translate the tagline.

OSGeo

Subbrands

With so many sub-brands at OSGeo, the new system must be flexible to allow for various configurations and hierarchies. Various subbrand relationships are available within the OSGeo brand family:

Subbrands (examples)

Distinct brand

Local Chapters Brands

With so many sub-brands at OSGeo, the new system must be flexible to allow for various configurations and hierarchies. Various subbrand relationships are available within the OSGeo brand family:

Distinct Local Chapters

With so many sub-brands at OSGeo, the new system must be flexible to allow for various configurations and hierarchies.

Various subbrand relationships are available within the OSGeo brand family:

Local Chapters

Principles of typography

Type tells a story. The right typeface, used consistently, builds character. Therefore two typography fonts have been chosen for the OSGeo Branding: Sintony and Miriam Libre.

Used in conjunction they carry across the open source and participatory community driven OSGeo platform.

For headers

Miriam Libre Regular

ABCDEFGHIJKLM
NOPQRSTUVWXYZ
abcdefghijklm
nopqrstuvwxyz
1234567890

Miriam Libre Bold

ABCDEFGHIJKLM
NOPQRSTUVWXYZ
abcdefghijklm
nopqrstuvwxyz
1234567890

For body text

Sintony Regular

ABCDEFGHIJKLM
NOPQRSTUVWXYZ
abcdefghijklm
nopqrstuvwxyz
1234567890

Sintony Bold

ABCDEFGHIJKLM
NOPQRSTUVWXYZ
abcdefghijklm
nopqrstuvwxyz
1234567890

Principles of colours

Color is the most fundamental yet most powerful tool in creating a mood and feeling. In our new corporate design we used a fresh and vibrant color palette; yet still recognizable to the old OSGeo color palette.

Logo usage: Do's

- ▶ Use only the official OSGeo logo available for download here. <— LINK
- ▶ Make sure the Brand Assets are displayed clearly.
- ▶ Keep enough space around the Brand Assets so they appear clean and uncluttered.
- ▶ Maintain proportions and preserve clear space around the OSGeo logo. For specific guidance on maintaining appropriate proportions, click here. <— Interne link
- ▶ The OSGeo logo is always above any subbrand name.
- ▶ If you want to direct others to OSGeo or to one of our subbrands, feel free to display our OSGeo logo side-by-side with other logos.
- ▶ If you include the OSGeo logo next to other logos, please display it in the same size as other logos.

Keep some space between the logo and text

If color is not available, use the black logo option.

Use the reverse for dark back grounds.

The minimum size for high resolution colour applications should be no less than 1" (25 mm).

The minimum size for high resolution black/white applications should be no less than 2" (50 mm).

Logo usage: Don't

It is important to remember that our logo must be presented consistently for it to be an effective ambassador for our organization.

The following are some typical examples of what not to do to our logo.

- ▶ Remove the OSGeo compass mark.
- ▶ Change, screen or decrease any of the colors within the logo.
- ▶ Modify the OSGeo Corporate and/or Subbrand logo in any way, such as by:
- ▶ Change the colors;
- ▶ Rotate the logo;
- ▶ Add shadow(s) to the logo;
- ▶ Outline the logo;
- ▶ Place the logo on similar green colors or colors of similar value;
- ▶ Separate elements in the design.
- ▶ Display the OSGeo logo larger than your own marks or branding.
- ▶ Use the OSGeo logo to refer to any product or service without contacting the OSGeo Marketing Committee.
- ▶ Feature the Brand Assets in connection with pornography, illegal activities, or other materials that violate the OSGeo Terms of Service, Community Guidelines, or Privacy Policies.

Do not stretch or condense the logo vertically or horizontally.

Do not rotate the logo.

Do not use low-res JPEG- and GIF formatted files for printed materials.

Do not alter the logo typeface or attempt to recreate the logo.

Do not change the logo color. Always use the standard configurations shown in the “Use of Color” section.

Do not reconfigure the logo.

Do not place the logo over complex photography or backgrounds.

Do not place the logo over coloured backgrounds

Photography

A distinctive photographic style has been developed.

It is based on a sense of geographical 'welcome'. It should reflect what it looks like in a specific area, and make people want to visit there. It should support our brand essence of 'Welcoming geospatial spirit' and our brand values: vibrant, living community culture, diverse, forward-thinking.

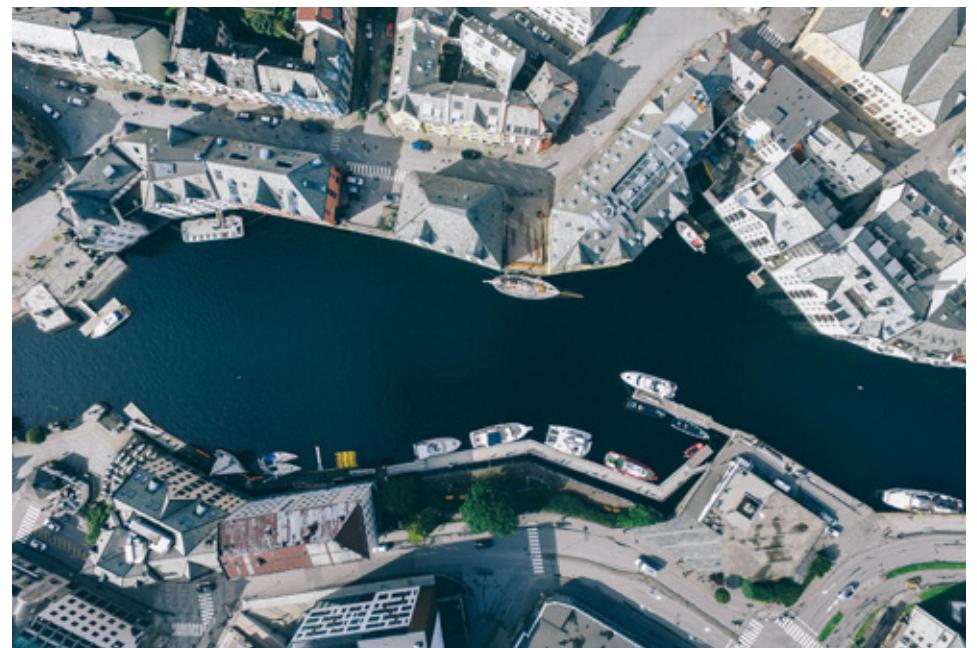

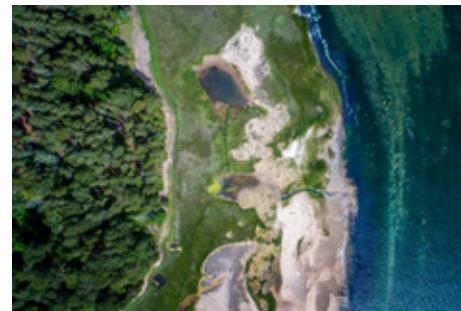

Mood

Explorable, spacious, topographical, cartographical, terrestrial, urban, open and energetic.

Branding elements

With use of your own photos you can add branding elements using the following:

50% Multiply Opacity with the Dark Green colour to fade out the photo (White text can be place on top)

Draw compass shapes

One-page Info

GeoForAll

Making geospatial education and opportunities accessible to all

GeoForAll Network

GeoForAll is a research and educational outreach initiative. It is a grassroots network of over a hundred participating labs, research groups, research institutes and universities.

Participants are committed to the use and development of free and open source software; the use of free and open data; the principles of open science in research; and the use of open education in teaching.

Open for All

GeoForAll provides participants the opportunity to join in the creation of a worldwide teaching and research infrastructure. It provides global learning and training opportunities, platforms for capacity development and access to quality education opportunities for all.

GeoForAll and their partners are responsible for growing the next generation of open source geospatial talent! Learn how your institution can participate at geoforall.org.

Open Education: GeoForAll offers a rich resource of open materials which can be reused and extended. Freely available resources include: webinars, multilingual courses, newsletters, educational and teaching content material.

Open Collaboration: GeoForAll provides its members with the ability to network and collaborate with people all around the world that share common interests and work together in projects and new ideas.

Open Science: GeoForAll contributes to science in general for the benefit of the whole society and for our future generations. Participating students and learners develop creative and open minds which is critical for building open innovation.

Flyer Front

The image shows the back page of an OSGeo flyer. It contains two columns of text under the heading "Um quibus explic tent rendandic te andigendae quibus ius adi odit, imin nam elignis cone vendaeped ut harum aut incotrecum faccatiam, qui consecum nectat. Mus ex et pre eatia dolore, testior eperias nesti sin nonesti asitis vollaritibus natur? Ferum sim laut acerio." The left column is titled "Mission and Goals" and the right column is titled "Incubation and Graduation". Both columns contain placeholder Latin text. At the bottom is the OSGeo logo and the website address "www.osgeo.org".

Desktop website

The image displays three side-by-side screenshots of the OSGeo desktop website, illustrating its design and layout across different sections.

- Left Screenshot (Homepage):** Shows the main homepage with a large banner featuring a satellite map of a forested area. The title "The Open Source Geospatial Foundation" is prominently displayed. Below the banner are three main calls-to-action: "Choose a project", "Why open source?", and "Join our community". Each section has a brief description and a button to "View all community news".
- Middle Screenshot (Project Page):** Shows a detailed project page for "The Open Source Geospatial Foundation". It includes a "Choose a project" section, a "Why open source?" section, and a "Join our community" section. Below these are "Community news" and "Foundation news" sections, each with several news items. At the bottom are sections for "Events", "Resources", and "Sponsors".
- Right Screenshot (Community Page):** Shows a community page with a large banner of a coastal city. It features a "About" section with a brief description of the foundation's mission. Below are sections for "Community news" (with news items for "OSGeo-Live 10.5 Released" and "Website and Branding Kickoff"), "Events" (with events like "Geospatial 2012", "OSGeo Meeting", and "FOSS4G"), "Resources" (with links to "OpenData & GeoNode: A Case Study for Institutional Investments in Open Source" and "OpenData & GeoNode: A Case Study for Institutional Investments in Open Source"), and a "Let's connect" section with social media links.

Mobile website

The screenshot displays the OSGeo mobile website with a clean, modern design featuring a green and white color scheme.

Top Bar: Includes the OSGeo logo, a search icon, and a menu icon.

Header: Features a large image of a satellite map of a forested area. Overlaid text includes "The Open Source Geospatial Foundation" and a "MORE ABOUT OSGEO" button.

Choose a project: A section with a "CHOOSE A PROJECT" button.

Why open source?: A section with a brief description and a "CHOOSE A PROJECT" button.

Migrate to open source GIS: A section with links to "OPEN SOURCE IN SCIENCE & EDUCATION" and "WHAT IS OPEN SOURCE?"

Join our community: A section with a description of how users can contribute to OSGeo projects and links to "CONNECT WITH OTHER USERS" and "MEET YOUR LOCAL COMMUNITY".
